- Advanced – Clinical Trials Coordinator and Manager levels

The program includes a comprehensive tri-tied mentoring framework and are built to global competencies for the clinical trials sector.

WHAT'S INCLUDED

The PROgress Program can be purchased by sites for individuals, several staff or for a group.

This includes:

- eLearning modules
- Interactive virtual workshops
- Mentoring sessions
- Resources for site and staff development

ABOUT THE PROGRAM

PROgress addresses the critical skill gaps unique to each professional by providing them with expert training and education, under a flexible learning model.

Using proven goal achievement, communities of practice and mentoring and capability frameworks, the PROgress Program harnesses a unique training model to accelerate the development of your research team, boosting workforce capability and site capacity.

PROgress supports early career CTCs, strengthening the development of key competencies by allowing them to implement what they have learned directly into the workplace setting.,

Training is provided at a AQF Level 9 and is endorsed by the Harvard Multi-Regional Clinical Trials Centre.
