THE UNIVERSITY OF
SYDNEY

Clinical Trials Fundamentals Microcredential

This microcredential equips research professionals involved in clinical research across pharmaceutical, medical device, health, public health, or allied health fields.

Developed with PRAXIS Australia and the University of Sydney, it reflects international clinical research standards and emphasises ethics, regulatory compliance, and pragmatic trial management.

What you'll learn:

- Important management and key documents for running a clinical trial
- Ethical principles and processes for informed consent
- Monitoring, reporting, and auditing to support decision-making
- Applying the National Statement to meet national requirements
- Applying Good Clinical Practice (GCP) to trial conduct

Whether advancing in your current role or expanding responsibilities, you'll gain a solid, internationally aligned foundation for compliant, ethical, and efficient trial practice.
